

ENTERPRISE SCALE KANBAN

16 - HOUR COURSE

Unleash the potential of enterprise agility, responsiveness, and resilience with a holistic approach to Kanban, tailored for large-scale implementations.

Designed for managers, change management professionals, and leaders in agile coaching roles, this comprehensive course sheds light on not just the core practices essential for expansive Kanban deployments, but also accentuates the significance of leadership, culture, and organizational maturity when utilizing Kanban at scale.

You will be introduced to the Kanban Maturity Model architecture as well as techniques to nurture fit-for-purpose organizations. During this intensive course, you will participate in collaborative group sessions with like-minded professionals, tap into a rich learning experience, and earn the distinguished Enterprise Kanban Management Professional (EKMP) credential. Through this course, you will be prepared to orchestrate a network of interconnected Kanban systems, paving the way for agile transformation across large business units.

Is Enterprise Scale Kanban the Right Course For Me?

If you are a manager, change management professional, or leader working in an agile coaching role, this course will benefit you and the development of your scaling capabilities inside any organization.

Manager: *"We've nailed Kanban at the departmental level but taking it enterprise-wide feels like a behemoth task. How can we scale without getting bogged down?"*

Change Management Professional: *"We've made leaps in agility, but I worry we'll plateau without a clearer roadmap for organizational maturity."*

Agile Coach Leader: *"We need to take our Kanban practices to the next level, but I'm uncertain about the cultural and leadership shifts required for effective large-scale implementation."*
