CERTIFIED KANBAN TRAINING

PORTFOLIO & PROJECT MANAGER

A three half-day course from Kanban University

THREE HALF-DAY COURSE

Creating Alignment: an Agile Pain Point Solution

A practical Kanban-based approach to managing projects and portfolios with greater visibility, better alignment, and smooth flow of value delivery.

Portfolio & Project Manager is a three half-day course for leaders, project and portfolio managers facing too many competing initiatives, unclear priorities, and overloaded teams. It shows how Kanban makes demand and capacity visible, so you can prioritize realistically and connect strategy with what actually gets delivered.

AT A GLANCE

DURATION
3 half-day sessions

FORMAT
Online

PREREQUISITES
None

Is Portfolio & Project Manager the right course for me?

If you need to connect strategy with what your organization can realistically deliver – across many projects and teams – this course is built for you.

You lead the portfolio.

- You are a leader responsible for connecting strategic goals with the work the organization can realistically deliver.

You coordinate projects.

- You are a project manager, portfolio manager, or coordinator working across teams and initiatives.

You need realistic delivery.

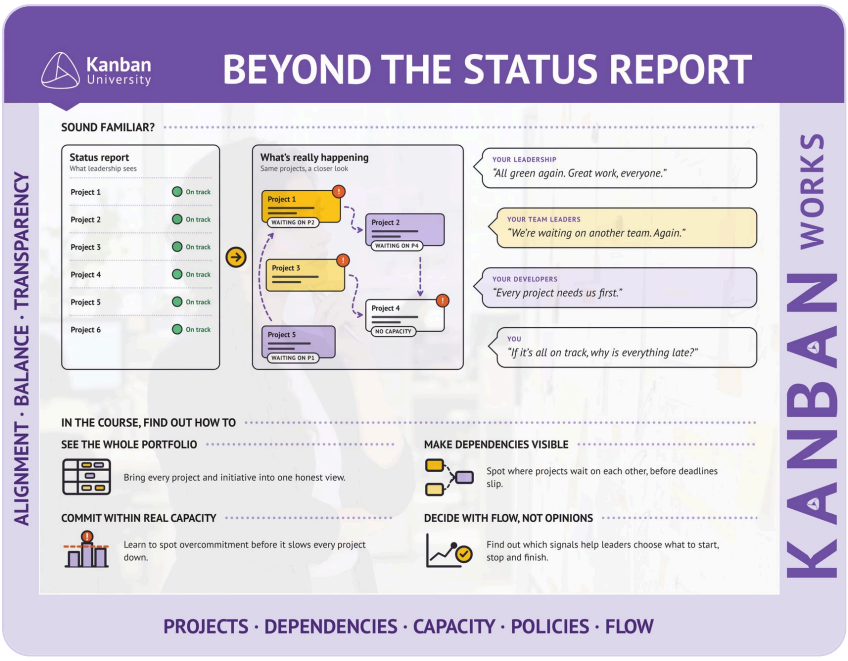

- You want capacity constraints, competing priorities, and delivery risk to be visible before commitments are made.

PORTFOLIO & PROJECT MANAGER

UNDERSTAND, ALIGN AND DELIVER

Practical Kanban principles and practices for managing portfolio-level demand, decisions, and alignment without adding another layer of process.

Completion and credential.

Successfully complete the course to receive your certificate of completion and the associated Portfolio Manager credential from Kanban University.

Certificate

PORTFOLIO MANAGER
KANBAN UNIVERSITY

Credential

Delivered online as **three half-day sessions** by an accredited Kanban University trainer. No prerequisites – basic Kanban knowledge is recommended; **Team Kanban Practitioner** and **Flow Manager** are good foundations.

Your outcomes from the Portfolio & Project Manager course.

01 Visualize portfolio demand
Make projects, initiatives, and portfolio-level demand visible in one practical view.

02 Connect strategy to delivery
Link strategic priorities with the work that is actually being delivered.

03 Improve alignment
Create stronger alignment across teams, projects, and organizational stakeholders.

04 See capacity constraints
Recognize overcommitment and make capacity constraints visible.

05 Set better policies
Establish clearer policies for selecting, prioritizing, and managing initiatives.

06 Use flow information
Use flow-based information to support more effective project and portfolio decisions.

07 Address Agile pain points
Identify and address poor alignment and competing priorities before they disrupt delivery.

08 Apply Kanban pragmatically
Apply Kanban practices without disruptive restructuring or replacing existing project-management approaches.
